[Chronicle of Malaysia](#) Philip Mathews 2014-02-28 This revised and updated edition of the *Chronicle of Malaysia* brings the full dramatic sweep of Malaysia's history up to date, taking the reader through the nation's first 50 years from the formation of Malaysia in 1963 all the way to 2013. It is packed with illustrated news stories covering hundreds of the nation's key social, political, cultural and sporting events. As a compendium of all aspects of Malaysian life, the book captures the mood of the day with a sense of vividness and immediacy. Concise, accessible articles—revised and rewritten to engage today's readers—are introduced by headlines and liberally illustrated with photographs and specially commissioned cartoons. The book is structured chronologically, with an average of eight pages devoted to each year beginning with a succinct summary of the year's key events. A host of themes are covered: not just the major political and economic events but also the human side of the Malaysian experience—sports, fashion, music, the arts, architecture, lifestyle, disasters, crime and the social scene. These combine to give readers the feel of each era of Malaysia's past and enables them to draw parallels with the present.

[Cities in Motion](#) Su Lin Lewis 2016-07-19 In the 1920s and 1930s, the

port-cities of Southeast Asia were staging grounds for diverse groups of ordinary citizens to experiment with modernity, as a rising Japan and American capitalism challenged the predominance of European empires after the First World War. Both migrants and locals played a pivotal role in shaping civic culture. Moving away from a nationalist reading of the period, Su Lin Lewis explores layers of cross-cultural interaction in various spheres: the urban built environment, civic associations, print media, education, popular culture and the emergence of the modern woman. While the book focuses on Penang, Rangoon and Bangkok - three cities born amidst British expansion to the region - it explores connected experiences across Asia and in Asian intellectual enclaves in Europe. Cosmopolitan sensibilities were severely tested in the era of post-colonial nationalism, but are undergoing a resurgence in Southeast Asia's civil society and creative class today.

[East and South-East Asia](#) Andrew T. H. Tan 2013-07-03 The economic growth of East and South-East Asia in the context of the global financial crisis has strengthened the view that this region is emerging in the 21st century as the most economically vibrant region in the world. With some of the largest economies, and generally high economic growth rates compared to the rest of the world, it is unsurprising that East and South-East Asia has become the subject of global interest. East Asia's rise inevitably focuses attention on the issue of China's emergence as a regional and global power. Such a prospect challenges the current status quo, in which the region is dominated by the USA and its regional allies, and issues in Sino-US strategic relations have raised global awareness of the need to understand this pivotal region better. In addition, the Taiwan issue continues to evoke nationalist sentiments in China, and North Korea continues to threaten regional stability. Non-traditional (or alternative) security issues are also of major importance in the region, including natural disasters and epidemics, as well as challenges relating to human rights and governance, transnational crime, demographic issues, economics and trade and regionalism. This Handbook aims to offer an insight into these issues. The volume is divided into two main sections. The first, *International Relations and Security Perspectives*, will focus on the international relations of the region, paying special attention to the key

state players. The chapter contributions will examine the security perspectives, and foreign and defence policies of these states, as well as key bilateral relationships. The second section will examine key Regional Non-traditional Security Issues, including globalization, transnational health challenges, population growth and the environment.

Collateral Damage Nicholas Khoo 2011 Although the Chinese and the Vietnamese were Cold War allies in wars against the French and the Americans, their alliance collapsed and they ultimately fought a war against each other in 1979. More than thirty years later the fundamental cause of the alliance's termination remains contested among historians, international relations theorists, and Asian studies specialists. Nicholas Khoo brings fresh perspective to this debate. Using Chinese-language materials released since the end of the Cold War, Khoo revises existing explanations for the termination of China's alliance with Vietnam, arguing that Vietnamese cooperation with China's Cold War adversary, the Soviet Union, was the necessary and sufficient cause for the alliance's termination. He finds alternative explanations to be less persuasive. These emphasize nonmaterial causes, such as ideology and culture, or reference issues within the Sino-Vietnamese relationship, such as land and border disputes, Vietnam's treatment of its ethnic Chinese minority, and Vietnam's attempt to establish a sphere of influence over Cambodia and Laos. Khoo also adds to the debate over the relevance of realist theory in interpreting China's international behavior during both the Cold War and post-Cold War eras. While others see China as a social state driven by nonmaterial

processes, Khoo makes the case for viewing China as a quintessential neorealist state. From this perspective, the focus of neorealist theory on security threats from materially stronger powers explains China's foreign policy not only toward the Soviet Union but also in relation to its Vietnamese allies.

Cultures at War Tony Day 2018-08-06 The Cold War in Southeast Asia was a many-faceted conflict, driven by regional historical imperatives as much as by the contest between global superpowers. The essays in this book offer the most detailed and probing examination to date of the cultural dimension of the Cold War in Southeast Asia. Southeast Asian culture from the late 1940s to the late 1970s was primarily shaped by a long-standing search for national identity and independence, which took place in the context of intense rivalry between the United States and the Soviet Union, with the Peoples' Republic of China emerging in 1949 as another major international competitor for influence in Southeast Asia. Based on fieldwork in Burma, Indonesia, Laos, Malaysia, the Philippines, Singapore, Thailand, and Vietnam, the essays in this collection analyze the ways in which art, literature, film, theater, spectacle, physical culture, and the popular press represented Southeast Asian responses to the Cold War and commemorated that era's violent conflicts long after tensions had subsided. Southeast Asian cultural reactions to the Cold War involved various solutions to the dilemmas of the newly independent nation-states of the region. What is common to all of the perspectives and works examined in this book is that they expressed social and aesthetic concerns that both antedated and outlasted the Cold War, ones that never became simply aligned with the ideologies of either bloc. The Value of Everything Mariana Mazzucato 2018-09-11 Modern economies reward activities that extract value rather than create it. This must change to ensure a capitalism that works for us all. Shortlisted for the FT & McKinsey Business Book of the Year Award A scathing indictment of our current global financial system, *The Value of Everything* rigorously scrutinizes the way in which economic value has been accounted and reveals how economic theory has failed to clearly delineate the difference between value creation and value extraction. Mariana Mazzucato argues that the increasingly blurry distinction between the two

categories has allowed certain actors in the economy to portray themselves as value creators, while in reality they are just moving around existing value or, even worse, destroying it. The book uses case studies—from Silicon Valley to the financial sector to big pharma—to show how the foggy notions of value create confusion between rents and profits, reward extractors and creators, and distort the measurements of growth and GDP. In the process, innovation suffers and inequality rises. The lesson here is urgent and sobering: to rescue our economy from the next inevitable crisis and to foster long-term economic growth, we will need to rethink capitalism, rethink the role of public policy and the importance of the public sector, and redefine how we measure value in our society.

Future Crimes Marc Goodman 2015-02-24 NEW YORK TIMES and WALL STREET JOURNAL BESTSELLER ONE OF THE WASHINGTON POST'S 10 BEST BOOKS OF 2015 One of the world's leading authorities on global security, Marc Goodman takes readers deep into the digital underground to expose the alarming ways criminals, corporations, and even countries are using new and emerging technologies against you—and how this makes everyone more vulnerable than ever imagined.

Technological advances have benefited our world in immeasurable ways, but there is an ominous flip side: our technology can be turned against us. Hackers can activate baby monitors to spy on families, thieves are analyzing social media posts to plot home invasions, and stalkers are exploiting the GPS on smart phones to track their victims' every move. We all know today's criminals can steal identities, drain online bank accounts, and wipe out computer servers, but that's just the beginning. To date, no computer has been created that could not be hacked—a sobering fact given our radical dependence on these machines for everything from our nation's power grid to air traffic control to financial services. Yet, as ubiquitous as technology seems today, just over the horizon is a tidal wave of scientific progress that will leave our heads spinning. If today's Internet is the size of a golf ball, tomorrow's will be the size of the sun. Welcome to the Internet of Things, a living, breathing, global information grid where every physical object will be online. But with greater connections come greater risks. Implantable medical devices such as pacemakers can be hacked to deliver a lethal jolt of electricity and a car's brakes can be disabled at high speed from miles away. Meanwhile, 3-D printers can produce AK-47s, bioterrorists can download the recipe for Spanish flu, and cartels are using fleets of drones to ferry drugs across borders. With explosive insights based upon a career in law enforcement and counterterrorism, Marc Goodman takes readers on a vivid journey through the darkest recesses of the Internet. Reading like science fiction,

but based in science fact, *Future Crimes* explores how bad actors are primed to hijack the technologies of tomorrow, including robotics, synthetic biology, nanotechnology, virtual reality, and artificial intelligence. These fields hold the power to create a world of unprecedented abundance and prosperity. But the technological bedrock upon which we are building our common future is deeply unstable and, like a house of cards, can come crashing down at any moment. *Future Crimes* provides a mind-blowing glimpse into the dark side of technological innovation and the unintended consequences of our connected world. Goodman offers a way out with clear steps we must take to survive the progress unfolding before us. Provocative, thrilling, and ultimately empowering, *Future Crimes* will serve as an urgent call to action that shows how we can take back control over our own devices and harness technology's tremendous power for the betterment of humanity—before it's too late.

War Memory and the Making of Modern Malaysia and Singapore Karl Hack 2012-01-01 Singapore fell to Japan on 15 February 1942. Within days, the Japanese had massacred thousands of Chinese civilians, and taken prisoner more than 100,000 British, Australian and Indian soldiers. A resistance movement formed in Malaya's jungle-covered mountains, but the vast majority could do little other than resign themselves to life under Japanese rule. The Occupation would last three and a half years, until the return of the British in September 1945. How is this period remembered? And how have individuals, communities, and states shaped and reshaped memories in the postwar era? The book response to these questions, presenting answers that use the words of Chinese, Malays, Indians, Eurasians, British and Australians who personally experienced the war years. The authors guide readers through many forms of memory: from the soaring pillars of Singapore's Civilian War Memorial, to traditional Chinese cemeteries in Malaysia; and from families left bereft by Japanese massacres, to the young women who flocked to the Japanese-sponsored Indian National Army, dreaming of a march on Delhi. This volume provides a forum for previously marginalized and self-censored voices, using the stories they relate to reflect on the nature of conflict and memory. They also offer a deeper understanding of the searing transit from wartime occupation to post-war decolonization and the moulding of postcolonial states and identities.
